DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6397752 issued to Yang in view of US 5431104 issued to Barker. Yang discloses an apparatus for explosively severing a length of pipe. The apparatus comprising, an explosive adapter 20 including detonating socket housings 150; tubular housings 18A, 18B connected by adapter 20; and, a spring. One or more of the adapters 20 may be used in series, therefore, opposite ends of either housing 18A or 18B will have the same configuration. Yang does not appear to disclose the use of a capacitive firing cartridge within the housing. Barker teaches the use of an EBW for initiating equipment placed in a well borehole, the EBW including a capacitor 23. At the time of the invention, one having ordinary skill in the art would have found it obvious to provide the explosive apparatus of Yang with the EBW of Barker. The suggestion/motivation for doing so would have been to provide an detonator having a lower actuation voltage requirement and to maintain safety.
